## Marcos A. Riveros Coronel

Ha participado en el siguiente curso de la Universidad Politécnica de Madrid:

### Networked control systems with Arduino: an introduction to technology, programming and robotics

The course presents the basic components in a simple networked control system and shows how this type of systems may be designed and implemented. The Arduino platform is introduced and different communication ports and protocols are described. Finally, techniques to connect a control system to the global Internet and allow a global data sharing are explained.

**Duración del curso:** 5 semanas (37 horas de estudio estimadas)
